Thermal film LINEN for lamination

Category: Lamination Film

Availability: estimated time of delivery 05.11.2025

code: **266**

Price: 0,00€

(image is symbolic)

Technical specifications

Core: 3 inch Material: BOPP film Surface: Linen Type: Dry film Quantity: 1 roll

Width: 320 mm, 490 mm, 630 mm, 690 mm

Length: 2000 m

Short description

Thermal Linen series is a partially acrylic coated, fineline structured, biaxially oriented polypropylene foil; the backside is coated with EVA Hotmelt.

The EVA needs some time for optimal bonding. The time for bonding depends on the used base material and should be tested before further processing. The thickness of the film is 35 μ m (+/- 5 %); the foil can be used for materials of various kinds. The optimum processing temperature of the laminating roll is between 100°C and 115°C.

- scratch-proof
- good tear resistance
- scentless
- better separability
- better planarity
- better readability, even of small writings
